Subject: Spreadsheet of all travel requests

Importance: Low

THIS IS AN AUTOMATED EMAIL

This table includes an ID for each request. This is so it can be provided to staff and staff can complete a post-fieldwork form to update the dates, and/or confirm completion of the requested fieldwork. They can report a post-poned trip, or a cancelled trip as well as a completed trip. If they complete a trip, a weekly item will be requested and sent to their manager for review.

To view the items on SharePoint, click [HERE](#)
 The Fieldwork Confirmation form can be found [HERE](#)

2021-06-14	2021-11-30	Iron Mountain Mine Superfund Site, Redding, Shasta County, California	<p>Primary travel will be conducted by Brian Milton as the lead RPM for this project. However, this is a blanket travel approval request for the EPA oversight program of the Iron Mountain Mine Brick Flat Pit Partial Dam Raise Project which will include a number of individuals from the SFD7, SFD6, and SFD8 branches and will span the duration of the summer and fall, through at least October 2021. Specific personnel and travel dates will be determined as the project progresses. Although the general project schedule is known many specifics cannot be determined until a three-week lookahead is submitted by the construction contractor. Based on this lookahead travel dates may need to shift and then shift again based on real field progress. This progress is also assessed during a standing weekly meeting with the construction contractor. A blanket travel approval will allow EPA employees the necessary flexibility to travel as needed to perform in-person oversight of this critical construction project. There will also be a number of events (a minimum of two) where there will be more than four (possibly up to ten) EPA staff traveling to the Site at the same time. The reason this is necessary is that we are developing an oversight program that allows for staff to take on "shifts" of oversight spread out over the summer and fall in order to fulfill our minimum oversight requirement for the project. The minimum oversight requirement for this project is two days of oversight per two-week period, most frequently split into one weekly trip of a minimum of one day. In order to effectively and efficiently bring EPA staff that will perform oversight up to speed, site visits with the primary RPM Brian Milton will be a requirement. This one-day overlap will provide crucial training so that the EPA employee can understand the project, be briefed on health and safety, and become familiar with the logistics of site access. Splitting these training events into smaller trips would still require overlapping EPA staff travel, and so for efficiency it has been determined that a fewer number of trips with larger groups of people will be more appropriate. COVID safety protocols will be in place to ensure</p>	<p>Approved by John Lyons Approved by SFD 6 Section Manager Approved by SFD 7 AD Approved by SFD 7 Section Manager</p>	201	Pending Regional Approval

2022-01-10	2022-01-14	Selma Pressure Treating Company Superfund Site, Selma, Fresno County, California	Rich Henry - ERT groundwater sampler Gary Newhart - ERT groundwater sampler Greg Powell - ERT Scribe data management and sample management Kelsey Bartling - Groundwater sampling and sample management Grace Ma - RPM.	Approved by SFD 7 Section Manager	312	

Start Date	End Date	Destination	Staff	Approval Summary	ID	Status
			Sampling oversight and coordination with residents Alejandro Diaz - CIC and Spanish interpretation Prior to the pandemic, six people were needed to conduct groundwater sampling at Selma in five days. In the past, this included 1 RPM, 1 CIC and 4 samplers. Grace and Alejandro are the only EPA employees who knows all of the private property owners where samples are collected. This is a rural, older community that is sensitive about the government coming onto their property. Community interaction is time intensive on these events. EPA has spent 5 years building relationships with the private property owners and it is important to facilitate a clear transition between the old RPM and the new RPM. See attachment for additional information.

The purpose of the field visit on Wednesday, 5/19/21, is to visit 5 homesites that are being considered by residents of the Red Water Pond Road Community for relocation under the Navajo Voluntary Alternative Housing program. Ms. Tom and Mr. Phipps propose to meet at Padre Canyon Rd CRHS-01 and then proceed to the other potential homesite	Approved by Regional Approver Approved by John Lyons Approved by SFD 6 AD Approved by SFD 6 Section Manager	180	

Start Date	End Date	Destination	Staff	Approval Summary	ID	Status
			locations. Other participating organizations will include Navjo Nation EPA, Gallup Joint Utilities, Navajo Land Development, and Weston. Together, they will Identify all abandoned homesite leases in the area that may be eligible for homesite lease applications. Weston will GPS all feasible homesite leases based on group discussion above. During the week of May 24, 2021, Ms. Tom and Mr. Phipps would oversee contractor gamma scans on the assigned homesites. The number of days in the field will depend on how many homesites are found to be viable. The May 19 visit may also identify other followup field work needs.
